Remote / origin

The screenshot displays the GitHub web interface for the repository 'falkreon / CSD-325'. The top navigation bar includes the repository name, a search bar, and various icons for repository management. Below the navigation bar, there are tabs for 'Code', 'Issues', 'Pull requests', 'Actions', 'Projects', 'Wiki', 'Security', 'Insights', and 'Settings'. The 'Code' tab is selected, showing the file structure of the repository. The file structure includes a 'main' branch, a 'module-1' directory, and several files: 'Ellingson-Assignment1_2.odt', '.gitignore', 'LICENSE', and 'README.md'. The 'module-1' directory is expanded, showing its contents. The main content area displays the commit history for the 'module-1' directory. It shows a single commit by 'falkreon' with the message 'Repository setup' and a commit hash of '729c0c7'. The commit is dated 'now'.

Name	Last commit message	Last commit da...
..		
Ellingson-Assignment1_2.odt	Repository setup	now
